THE FUTURE OF COOKING SINCE 1875

12 January 2004

For Immediate Release

## Espress Yourself...

### **THE NEW, SIMPLY DIGITAL, BUILT-IN COFFEE MACHINE FROM KÜPPERSBUSCH**

Cappuccino, Latte, Macchiato, Espresso or just a cup of Joe, the built-in, fully plumbed, fully automated, all stainless steel, self-cleaning coffee machine from Kuppersbusch will elevate your coffee experience to the purest form. Like having your own live-in Barista the on-board computer, featuring “Touch-Me® “ technology, controls the complex process of coffee making while guiding you through an assortment of user-friendly programs. The Simply Digital Coffee Machine from Küppersbusch ...It’s like having a coffee house in your kitchen.

#### **A TRUE TWO-CUP, FULLY-AUTOMATIC MACHINE**

As the core of the Simply Digital Coffee Machine stems from the Küppersbusch Professional Line, it can brew two cups of coffee in just one go. This saves time, especially when you have several guests.

#### **HEIGHT-ADJUSTABLE COFFEE DISPENSER**

No matter if you are using a small espresso cup or a larger mug for your morning coffee, any cup will fit under the adjustable coffee dispenser. This helps to avoid coffee splatters and guarantees a deliciously rich aroma.

#### **TOUCH-ME® TECHNOLOGY**

Whether it’s putting you only a couple of button pushes away from your favorite coffeehouse concoction, or assisting you in customizing your own personal brew, the Kuppersbusch “Touch-Me” technology uses intuitive software and an easy-to-read digital display to place the mysteries of coffee squarely under your control. It lets a novice make a perfect macchiato, and the seasoned veteran set specific levels of grounds, milk, and water, even temperature, for each individual type of beverage. And even when you’re done, “Touch-Me” technology lends a hand. Integrated self-cleaning and calcium deposit removal programs enable regular, easy maintenance without ever having to take out the brewing unit.

#### **TWO SEPARATE HEATING UNITS**

Of course the fully automatic, built-in coffee machine also prepares hot water for tea or other hot beverages, as well as steam. Thanks to the two separate heating units, which are permanently active for hot water and steam, it is easy to prepare any one of the countless coffee-specialties. The two-step steam nozzle can either heat milk for Caffè Latte or foam milk for Cappuccino. Also the amount of steam can be individually programmed.

#### **GRINDER**

In order for the selected coffee beans to perfectly develop their full aroma, they must first be ground to the optimal degree. The round grinder provides for the necessary mixture of fine particles and slightly more coarse powder.

Küppersbusch products are available only through Architects, Interior Designers and select Kitchen Specialists.
