

Küppersbusch

THE FUTURE OF COOKING SINCE 1875

Indulge Your Inner Chef!

With the arrival of Simply Digital® cooking, brought to you exclusively by Küppersbusch, it no longer matters whether you are a consummate gourmet or simply an amateur chef. The most technologically advanced oven series on the market today, the new fully digital EEB 9800 and 6800 series' ovens make preparing a gourmet meal as simple as selecting pork, fish, meat or poultry and entering the weight. The oven will automatically select a program from a variety of cooking options such as convection, radiant, broil, bake, or a combination of the four. It will then compute the finish-time and alert you when your meal is ready. Guests running late?

Not a problem, as you can simply adjust your finish-time and the oven will re-calibrate, lower the heat, and finish your meal at the appointed time, without drying out your food.

As with all Küppersbusch ovens, cooking odors are a thing of the past. Our exclusive “okotherm” catalytic convection process breaks down grease, odors and smoke into water vapor and CO². The patented “okotherm” oven virtually cleans itself, while at the same time creating a healthier, cleaner and odor-free kitchen environment.

The new Küppersbusch Simply Digital® series offers 16 pre-programmed languages, 13 pre-set baking and roasting programs, 10 cooking settings, 6 energy-saving features and 2 memory programs for your favorite recipes. The Stainless Steel oven, in both 24” and 36” widths, can be personalized using 6 different handle options. Also offered are telescopic full-extension glide-out racks and the exclusive BackMobil® internal rollout system.

Küppersbusch has brought digital cooking to your fingertips. So, go ahead. Indulge *your* Inner Chef.

Küppersbusch products are available only through Architects, Interior Designers and select Kitchen Specialists.
