

Küppersbusch

THE FUTURE OF COOKING SINCE 1875

Professional Details for the Home Kitchen

Recognized as one of the worlds largest manufacturer of restaurant and hotel kitchen equipment, professional chefs, the world over, agree that Kuppertsbusch appliances are indispensable in the workplace due to their ease of use, quality craftsmanship, perfected ergonomics and personalized options.

Now, thanks to Küppersbusch, what was once considered the benchmark of quality for the professional kitchen is now the standard for today's home. After careful evaluation, each piece of the Profi-Collection was individually selected from the Küppersbusch Commercial Division for its aesthetics, functionality and adaptability to a residential environment. The Profi-Collection is an advanced cooking system featuring the built-in simplicity of "Touch-Me" technology for ease of use by either the amateur chef or consummate gourmet.

The Profi-Collection includes a 36" Profi-MaxiOven (EEB 9800 + 9600), and the Profi-Cook Center (KCT 906.2). The elements were designed to function individually or they can be combined with a stainless steel frame to form the Profi-Chef Center. In addition, 2 designer hoods are available to complete the package.

The newest addition to the Profi-Family is the ProfiCoffeeCenter. Taken directly from the coffee houses of Europe, this all-metal, self-cleaning, fully automatic, one-touch cappuccino machine is like having your own live-in Barista.

Since 1875 Küppersbusch appliances have found themselves in the great hotels and restaurants of Europe. Today, the Küppersbusch name has become synonymous with quality, design and advanced cooking technology. Dedicated to Friedrich Küppersbusch's founding principle of quality over quantity, Küppersbusch AG has fostered a revolution in high design that is recognized the world over. Küppersbusch believes that the appliance for the home, be it an oven, cooktop or dishwasher, must be practical, durable, as well as beautiful, and at the same reflect the simplicity of design and the advancement of technology.

Due to exclusive design, proprietary technology and controlled distribution, Küppersbusch is available only through select kitchen specialists, architects and interior designers.
